

Pyintel Production Document

Organization: Pyintel Open Ecosystem

Document ID: PYINTEL-DOC-001

Status: Approved & Verified

Welcome

This is the canonical Pyintel sample document used by the open-document-media-suite test suite. It is checked in as plain Markdown so reviewers can read it directly in any editor.

Sections

Why this file exists

The fixture underpins three suites:

- test/suite.test.js — markdown_to_pdf + pdf_search + pdf_merge + pdf_split
- test/matrix.test.js — same flows plus the 12-pair image / 20-pair audio / 20-pair video matrix
- test/run_exhaustive_matrix.js — official Pyintel artifacts and the 53-pair matrix

pdf_search asserts the literal word Pyintel is present somewhere in the rendered PDF stream, so this file contains it in the heading and in the body on purpose.

Real content

Document conversion should never be lossy on the input side. This file contains paragraphs, an unordered list, and a code-fenced block, all in CommonMark so any compliant renderer can handle it.

- Reads cleanly in any text editor
- Renders to a real PDF with a %PDF-1.4 header
- Survives merge, split, and text-search round-trips

Note: the word "Pyintel" appears in this file intentionally so the test suite's pdf_search query always returns a positive match.
